DATA AGE - THE GLOBAL DATASPHERE 2025 TRENDS & DATA-READINESS FROM EDGE TO CORE

175 Zettabytes

The global datasphere will grow from 33 zettabytes in 2018 to 175 zettabytes by 2025. IoT devices are expected to create over 90 zettabytes of data in 2025.

49%

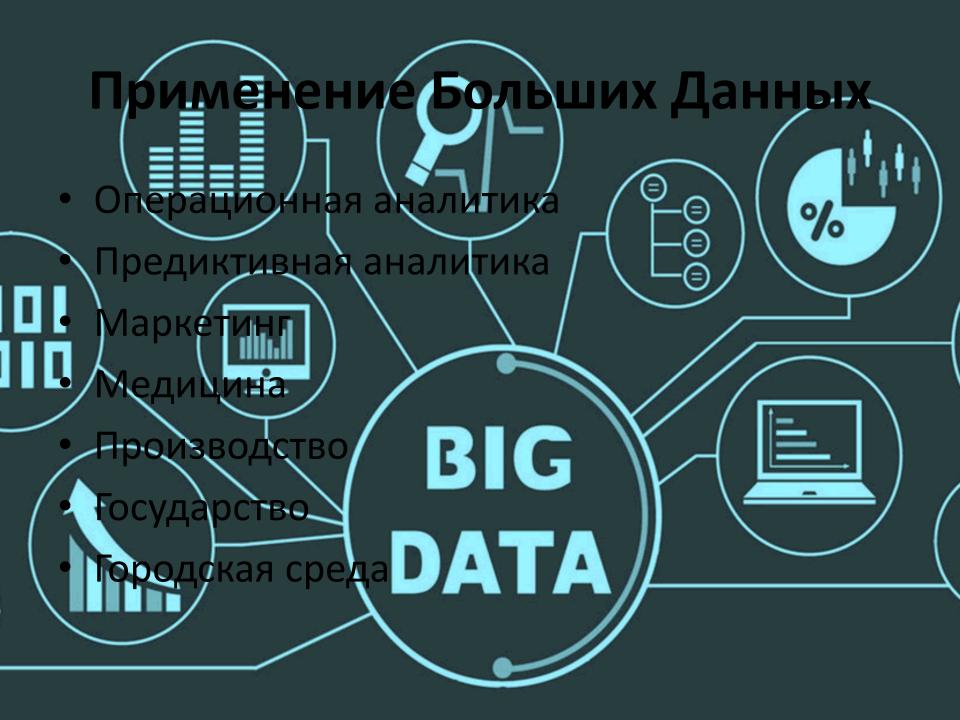

By 2025, 49% of all data worldwide will reside in public cloud environments as cloud becomes the new core.

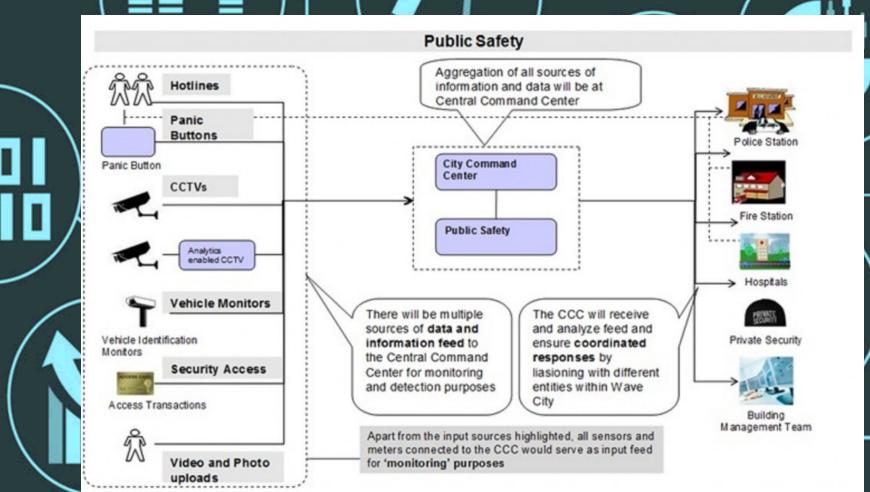

30%

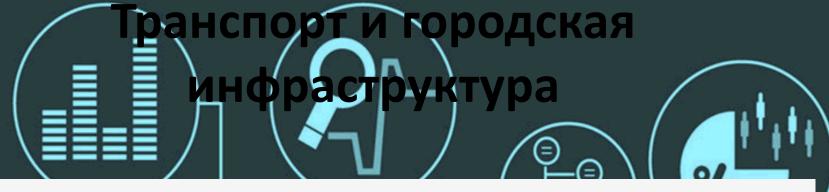

In 2025 nearly 30% of the world's data will need real-time processing as the role of the edge continues to grow.

Общественное здравоохранение

Supply drivers

Medical & patient data

Electronic Health Records (EHR) health sensors, social media, and genomics create rich new data sources for analytics

Big data analytics

Cheap computing power and sophisticated analytics drive insights into patient behavior, treatment costs and R&D

Moblie/mHealth

Pervasive mobile and smart phone adoption creates new engagement models within daily routines

Health care professionals digital workflow

Increasing integration of EHRs and telehealth drives new digitally-enabled coordinated workforce models of care

Roll out business models tied to patient outcomes that also reduce medical errors and improve quality

Discover and deliver targeted and personalised therapies with real-world evidence of impact

Health information technology-enabled opportunities

Influence patients behaviors beyond the pill' and sustain engagement outside the traditional care setting

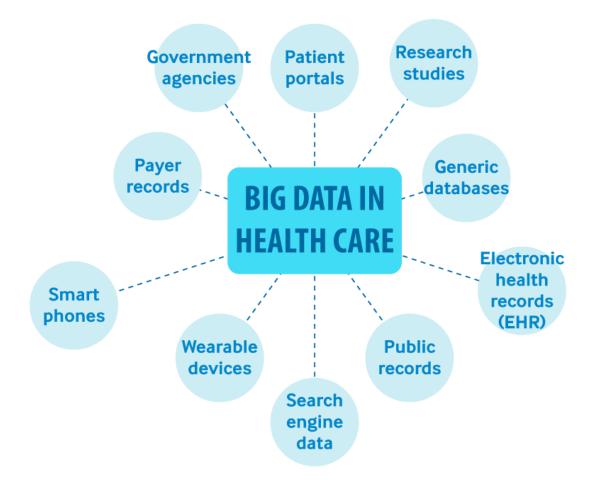

Drive population health management, protocoldriven patient risk pool and stratification management

Note: Of the 25 services covered in our survey, 15 are shown here. Usage means that a user completed at least some part of a transaction online. Each country may not allow end-to-end transactions online for a service. Survey question (usage): "Have you used the internet for the following interactions with government at least once in the past two years?" Respondents who answered "Yes" have been included. Survey question (satisfaction): "How satisfied are you with the use of the internet in delivering each kind of government service?" Response options range from 1 to 7, where 1 = "Extremely dissatisfied" and 7 = "Extremely dissatisfied" and 7 = "Extremely dissatisfied" and 8 = "Extremely dissatisfied" and 9 = "Extremely dissatisfied" an ly satisfied." Respondents who selected 6 or 7 have been included as satisfied.
